Weekly Progress Report

Name: Amarnath
Domain: Digital Marketing
Date of submission: 03-10-2026
Week Ending: 03
Project: Meta Ads Audience for an EdTech Company's Digital Marketing Course

I. Work Done During the Week:

1. Tasks Completed:

- Built the campaign structure in Meta Ads Manager: one campaign with the objective set to Leads, three ad sets (Students, Early-career professionals, Freelancers / business owners) and ads under each.
- Finalized the audience settings in each ad set: location, age, language, interests, behaviors and placements, as planned in Weeks 1 and 2.
- Prepared the final ad creatives (Reel, single image and carousel) with a headline, primary text and call to action such as *Learn More* / *Sign Up*.
- Defined the key metrics to track: Reach, Impressions, CTR, CPC and Cost per Lead, and prepared a simple format to record them.

2. Milestones Achieved:

Task	What was done	Milestone / Outcome
Campaign setup	Created campaign and 3 ad sets with objective: Leads	Complete campaign structure ready
Audience finalization	Applied final targeting in each ad set	Focused audience for each segment
Budget plan	Planned a daily budget split across the 3 ad sets	Fair test of every segment
Ad creatives	Finalized 3 formats with copy and call to action	Ads ready for review
Tracking plan	Selected metrics and prepared a tracking format	Clear way to measure results
Mentor feedback	Shared audience and ad plan with mentor / peers	Feedback collected and applied

3. Significant Contributions:

- Converted the audience research of the first two weeks into a complete, ready-to-launch campaign plan.
- Example: the Students ad set uses a career-focused headline (*"Get Job-Ready in Digital Marketing"*), while the Professionals ad set highlights skill growth and promotion.
- Improved the ad copy and the budget split after suggestions from mentor and peers.

II. Challenges and Hurdles:

1. Choosing the Right Campaign Objective:

- **Nature:** Objectives like Traffic, Engagement and Leads looked similar, and the wrong choice could waste budget.
- **Approach and solution:** Read the Meta Business Help Center, understood that Meta shows ads to people likely to take the chosen action, and selected Leads because the goal is course enquiries.

2. Budget Allocation Across Ad Sets:

- **Nature:** With a limited budget, it was hard to decide how much each segment should get.
- **Approach and solution:** Started with an equal split for fair testing, with a plan to shift budget to the best-performing ad set later.

3. Understanding Tracking and Metrics:

- **Nature:** Conversion tracking (Meta Pixel) and metrics like CTR and Cost per Lead were confusing at first.
- **Approach and solution:** Watched tutorials, noted what each metric tells, and prepared a simple tracking format.

III. Lessons Learned:

1. Insights from the Challenges:

- The campaign objective decides who Meta shows the ad to, so it must match the business goal.
- An equal-split test budget gives fair data before spending more on one segment.

2. New Skills Acquired:

- Campaign, ad set and ad setup in Meta Ads Manager, budget planning, metric tracking and ad copywriting.

3. Problem-Solving Techniques:

- Breaking a big task into small steps, reading official documentation and testing one change at a time.

4. Valuable Experience for the Future:

- Planning the full flow from audience to ad to metrics will help me in real client campaigns.
