Weekly Progress Report

Name: Amarnath
Domain: Digital Marketing
Date of submission: 08-10-2026
Week Ending: 05
Project: Meta Ads Audience for an EdTech Company's Digital Marketing Course

I. Work Done During the Week:

1. Tasks Completed:

- Applied the mentor and peer feedback on the final project document: clearer audience criteria, shorter reasons and a cleaner layout.
- Prepared a one-page summary of the final Meta Ads audience (location, age, language, demographics, interests, behaviors) with the reason for each choice.
- Created a retargeting plan: a warm audience of video viewers and page engagers, with a separate ad message for people who showed interest but did not enquire.
- Studied Meta Pixel and conversion events to understand how lead tracking works on the course landing page.

2. Milestones Achieved:

Task	What was done	Milestone / Outcome
Feedback applied	Updated the project document after review	Improved, clear final document
Audience summary	Wrote a one-page summary with reasons	Easy-to-understand audience profile
Retargeting plan	Defined warm audience and follow-up ad message	Full funnel from new to interested users
Tracking knowledge	Learned Meta Pixel and conversion events	Clear understanding of lead tracking
Project readiness	Checked every project requirement	Project ready for final submission

3. Significant Contributions:

- Turned the project into a complete, reusable audience guide for an EdTech company's Digital Marketing course.
- Example: the retargeting ad for warm users says *"Still thinking about Digital Marketing? Join the course and start today."*, while new users see a skill-based message.
- Explained the reason behind every targeting choice, which is the main requirement of the project.

II. Challenges and Hurdles:

1. Understanding Meta Pixel and Tracking:

- **Nature:** Terms like Pixel, events and conversions were new and technical.
- **Approach and solution:** Read the Meta Business Help Center, watched tutorials and wrote simple notes on what each event tracks.

2. Making the Document Short but Complete:

- **Nature:** There were many criteria and reasons, and the document became long and hard to read.
- **Approach and solution:** Used tables, short bullet points and clear headings, and removed repeated points.

3. Planning Retargeting with Small Audiences:

- **Nature:** Warm audiences are small, so reach can be limited.
- **Approach and solution:** Combined multiple sources (video viewers, page engagers) and planned to add Lookalike audiences to grow reach.

III. Lessons Learned:

1. Insights from the Challenges:

- Tracking is necessary to know which audience and ad actually bring leads.
- Clear and short presentation of findings is as important as the research itself.

2. New Skills Acquired:

- Retargeting strategy, basics of Meta Pixel and conversion events, and professional report writing.

3. Problem-Solving Techniques:

- Learning a new topic through official documentation, noting key points and applying them to the project.

4. Valuable Experience for the Future:

- Planning a full funnel from new audience to retargeting will help me in real campaigns for future clients.
